

Speech Enabled Clinical Documentation Solution For Your Practice.

Reimbursement cuts are coming. Now is the time to dramatically cut costs and embrace smarter technology on the road to meeting EMR meaningful use criteria.

Let us show you how to significantly lower your transcription costs by 80-90% today, while getting ready for EMR adoption or enhancing your existing EMR, all at the same time!

In a unique and innovative way, MDinTouch SR (Speech Recognition) allows Physicians to **quickly and easily** create their own clinical reports using Dragon Medical: eliminating transcription costs and achieving immediate turnaround time.

How It Works

Leveraging Dragon Medical, Physicians simply dictate into a fully customizable template, review, electronically sign and auto-distribute reports all in one shot!

MDinTouch SR can be used as a standalone document management system or can be layered on top of your existing (or future) EMR.

Training and Mentoring Services

MDinTouch's training services has a successful, proven track record with guaranteed results.

As a Dragon Certified Partner, MDinTouch takes the time to teach Physicians how to easily apply Speech Recognition technology within their daily workflow. Subscription includes: installation, profile creation, user training & report feedback analysis.
